Problem Solving
Critical Thiniking

EDUCATION

Bachelor of Technology
Govt. Engineering College, Rewa MP
RGPV UNIVERSITY

2020-2024

Electronics and Communication Dept.
CGPA: 7.04

Senior Secondary (Class 12th)
Govt. Boys HS School, Sirmour, Rewa
MP BOARD

2019-2020
Percentage: 88.8%

Secondary (Class 10th)
Govt. High School, Umari, Rewa
MP BOARD

2017-2018
Percentage: 90.6%

OBJECTIVE

Results-driven Data Analyst with a robust foundation in data analysis, cleaning, transformation, modeling, and visualization. Skilled in utilizing SQL and various data manipulation tools to extract actionable insights from complex datasets. Proven ability to solve problems through detailed analysis, critical thinking, and effective communication. Proficient in SQL for querying and managing relational databases. Completed comprehensive training in data analysis and data visualization, demonstrating the ability to translate data into meaningful business recommendations.

TRAINING AND INTERNSHIPS

Data Analytics Training

WS CubeTech   June - Sep 2024

- Mastered Advanced Excel for data manipulation, analysis, and automation using functions, pivot tables, and charts.
- Gained proficiency in SQL for querying, managing, and analyzing relational databases.
- Developed skills in Power BI to create interactive dashboards and reports, visualizing complex datasets.
- Acquired skills in data cleaning, transformation, modeling and visualization techniques.
- Developed and executed projects on Mega Market Sales Analysis, Pizza Sales Analysis and Zomato Analysis, showcasing proficiency in data analysis and visualization.
- Gained hands-on experience in creating dynamic dashboards and reports using Power Bi.
- Enhanced understanding of data-driven decision-making through practical applications and real-world scenarios.

Tally Course Training

Internshala   June 2023

- Gained a strong understanding of Basic Concepts of Accounting, including double-entry bookkeeping and financial statements.
- Explored The World of Tally, mastering the user interface and key functionalities of Tally Prime. Learned the Accounting Process in Tally, including voucher entry, ledger management, and financial reporting.
- Developed skills in Bank Reconciliation Statement (BRS) to match bank records with company accounts.
- Acquired knowledge in Tax Deducted at Source (TDS) and Tax Collected at Source (TCS) accounting within Tally Prime. Managed Payroll in Tally, including employee salary processing, deductions, and statutory compliance.
- Applied Goods & Services Tax (GST) Accounting in Tally for compliance with Indian tax regulations.
- Practiced Data Extraction from Tally for generating financial reports and conducting data analysis.

PROJECTS

Mega Market Sales Analysis Project

Sep 2024

- Conducted in-depth analysis of Mega Market sales data using SQL to extract, transfom, and load (ETL) relevant datasets.
- Utilized Power BI to create interactive dashboards and visualizations, providing insights into top-selling products, region-wise sales distribution, and category-wise performance.
- Implemented advanced DAX functions in power BI to calculate key performance indicators(KPIs) such as total revenue, sales growth, and customer segmentation.
- Analyzed sales trends to identiy seasonal patterns, contributing to data-driven decision-making for inventory management and marketing strategies.
- Optimized SQL queries to efficiently handle large datasets, ensuring accurate and timely reporting.
- Presented actionable insights to stakeholeders, leading to improved sales strategies and enhanced business performance.

Hotel Booking Trends Analysis Project

July 2024

- Performed data cleaning in Excel to remove errors, duplicates, and inconsistencies, ensuring high-quality data for analysis.
- Applied data manipulation techniques to reorganize and reformat the dataset, making it suitable for detailed analysis.
- Developed a data model using Excel's built-in functions, connecting various data sources to analyze relationships and trends.
- Utilized PivotTables to summarize, group, and filter data, enabling dynamic exploration of booking cancellations across multiple dimensions.
- Designed and created an interactive dashboard in Excel to visualize key insights, including cancellation trends, customer segments, and revenue impact.

Pizza Sales Analysis Project

July 2024

- Calculated the total revenue generated from pizza sales, providing insights into financial performance.
- Identified the highest-priced pizza, contributing to pricing strategy and profitability analysis.
- Determined the most common pizza size ordered, revealing customer preferences and potential inventory needs.
- Listed the top most ordered pizza types along with their quantities, highlighting popular products and sales trends.
- Joined tables to find the total quantity ordered for each pizza category, delivering insights into category performance.
- Calculated the percentage contribution of each pizza type to total revenue, emphasizing high-impact items and optimizing menu offerings.
